a component of the US Public Health Service
Department of Health and Human Services

Health Center Services

Brought to You by Your Agency
and
Federal Occupational Health

We all need basic preventive healthcare. Why waste time, energy and money arranging for these services on your own? Many are already available within your own Federal Occupational Health (FOH) Clinic at no cost to you. FOH professionals are prepared to help with your healthcare needs at our on-site clinics.

ON-SITE FIRST AID: Minor illnesses and injuries do occur at or near the worksites. We can give you the care you need to finish your workday in comfort.

IMMUNIZATIONS: Influenza and Pneumonia vaccinations are available in your health center to help prevent these life-threatening diseases.

PHYSICIAN PRESCRIBED SERVICES: Sometimes a physician will prescribe treatments or services that can be provided in our health center.

HEALTH AWARENESS PROGRAMS: Educational classes on a wide variety of topics are available through your health center. Got a question or suggestion? Tell us!

HEALTH SCREENINGS: Health Screenings give you key information about your health status. Stop by the Health Center to ask about screenings for high blood pressure, cholesterol, diabetes, and vision.

HEALTH RISK APPRAISALS: Want to know more about your own health, and how to decrease the chance of cancer, heart disease or stroke? Ask the health center for a Health Risk Appraisal, and you will get a personalized report with “how to” get on the road to health and wellness!

For additional information about health and services available through FOH, visit our website at www.foh.dhhs.gov.
